Notes
<ul style="list-style-type: none">• This is a blank test material and cannot be purchased on its own; this test material should only be used in conjunction with T09160QC pesticide residue material.• Mix the QC material thoroughly before taking a representative analytical sample.• This blank test material has been screened to a level of 10 µg/kg, this does not preclude the ability of sensitive methods to find pesticide residues below this level.• Fapas® advises that the QC material is analysed within the recommended date. Fapas® QC materials are intended to be used as single-analysis samples.• Full details on the proficiency test procedure used to characterise this QC material are available in the Protocol, Part 1 - Common Principles, freely available to download from the Fapas® website.
